Ismael Mathay Sr. High School visits PHILCAMSAT

Dr. Modesto G. Villarín, Principal of Ismael Mathay Sr. High School (IMSHS), together with his staff Mr. Augustus Czaesar M. Parra and Mr. Jessie Balinguit, visited PHILCAMSAT for a benchmarking event. They were accompanied by representatives from the Quezon City Division's Office, headed by Dr. Helen Flora, Education Program Supervisor, and architects and engineers from the Quezon City LGU. The visit was designed to help provide IMSHS with ideas of how they can effectively design their planned Maritime Laboratory which will be established at the IMSHS campus.

PHILCAMSAT QA and Program Director, C/E Alfredo Haboc, gave them pointers on how this project should be dealt with given the available resources and what will be the most effective laboratory equipment that must be installed in a way that will support all the technical specialization courses of the SHS Maritime Tech-Voc track.

This is PTC's first MSMS partner that has been provided full program support by the local government.
